Then create a custom work order to do all the reworking. I would suggest all the work to be done on one rework work order and re package under the original batch numbers.

And have it on the work order that the pins must spin freely and must be inspected by Patrick Duval or Eric Downing

Hope this helps

All the 119's in stock should be reworked to have the inside diameter of the ghw cross bolt spacers to max size.

So nothing should be packaged.

My understanding is that all D119-646-XXX Skidtubes in stock have been or will be reworked. QC and Landing Gear are to work together in improving the QC Jig and manufacturing process in accordance with our findings.

EricD, feel free to correct me or add any info I might have missed.

Hi,

Has this been resolved, or do we still have to quarantine all the 119 skids? We have quite a few ready to package and would like to know what to do with them...

Hi Nigel,

Please see email received from Martin on Tuesday. I've already touched base with most of you earlier today however we will be meeting on Wednesday to discuss further. A meeting invite will be sent before end of this week.

Also, and as discussed with Bill earlier today, please hold production/shipment of all A119 skid tubes until further notice.

Thanks,
Marc

Subject: RE: DART visit to assess ground handling wheels fit issues - [AW Internal Use ONLY]

All,

Notes of the fitting of the FWD Ground Handling Wheels on DART Skid tubes part number D119-646-211/212 on the AW119MKII. Marc Bellavance from DART supported the assessment along with Engineering and QC from P145 Completions and P21 Production:

Firstly Marc was shown the AW standard ground handling wheels and how they were installed onto the DART tubes, a check on the 3 aircraft above in the P145 hanger resulted in the wheels only being able to be installed on one of the tubes on 14786. The tubes on 14792 were installed on the aircraft late in 2013 those on 14826 and 14786 were installed within the last 3 months, aircraft records for the Skid Tubes did not include the batch numbers. A check was then made using the DART jig and gave the same results as the wheels except it was possible to install the jig on one other set of Skid Tubes though it was tight. The jig was then used for a fit check on the aircraft in the P21 hanger and the warehouse, overall results as follows:

Skid Tubes assessed:

Results

3 sets on aircraft in the P145 hanger non 14792, 14826 and 14786	Wheels fitted on one skid tube,
Jig was able to be installed on two skid tubes, was tight on the second	

Conclusion

AWPC reviewed the Jig DART use for the drilling of the cross tubes, this jig is a very simple bar that picks up on the fwd saddle hole on each side of the tube, each is then drilled independently against this reference. Therefore any error in the saddle hole dimensions side to side and any error in the drilling is transferred to the skid tube handling wheel holes. The drilling jig does not prevent horizontal drilling errors across the tube and transfers longitudinal errors where they exist from the saddle reference point. It is the opinion of AWPC that the holes must be match drilled using a one piece jig that straddles the fwd end of the cross tube and also defines the longitudinal position. A single piece jig will prevent longitudinal and cross tube errors and should ensure good wheel assembly fit.

It was also noted that when the test jig fitted easily the wheels fitted well though with slightly less slack, where the test jig was hard to fit the wheels would not fit. Suggesting the test jig general tolerances are not as tight as the hole tolerances in the wheel assembly. The reverse should be the case so if the jig fits it guarantees the wheels will fit.

Regards

Martin

When: Tuesday, August 19, 2014 10:00 AM-11:00 AM (UTC-05:00) Eastern Time (US & Canada).
Where: Completions Engineering Meeting Area

Recently we have sent several sets of DART Skid tubes back to DART due to ground handling wheels not fitting, DART stated last week they had recently checked 4 tubes and in their view the wheels should fit as they had manufactured a Jig that matched a pair of wheels they had been loaned by a customer.

Marc Bellavance' is here to review fit issues between the AW Ground Handling Wheels and the DART Skid Tubes.

We will have the DART test jig used during Skid Tube manufacture and two sets of AW Ground Handling wheels, one new and one used.

In P145 we have two sets of DART Skid Tubes on Aircraft and also plan to make check fits on aircraft in P21, also in P145 we have several sets of AW Skid Tubes for comparison.

First we will meet to discuss plan for the day then go out to the hanger and check the fit
